

**CRG Texas, LLC**  
**Quick Response Services**

CRG Texas provides quick response sampling, abatement, and assessment services. Whether you have a release indication (impacted utilities or basements, discovery during excavation, release detection system alarms, odors in soil or water, free product visible, etc.) we can address your needs accordingly. Our quick response services are designed to help our customers when they need immediate response to:

- initiate product recovery and abatement using fluids and vapor recovery materials and equipment
- determine source locations through atmospheric, subsurface, and trace gas testing, or
- through conventional petroleum storage tank and line testing techniques
- collect soil, surface water, and groundwater samples for fast turn around analytical
- monitor construction worker breathing zones using organic vapor meters and O2/LEL meters

CRG Texas only provides safety trained knowledgeable and experienced personnel to perform vapor, soil, surface water and groundwater sampling services. We also will oversee subcontractor vapor, vacuum, or pressure testing; product recovery vacuum truck events, and mobile dual phase extraction events. We carry an assortment of absorbent booms and pads, absorbent floor sweep, 55-gallon drums, thief pumps, hand bailers, and discreet samplers in our warehouse for 24 hour access and readily available inventory.

***Call us at 713-517-7591 or at 713-992-2094 to address your quick response project needs!***
